

Implement Greedy search algorithm for any of the following application:

- Selection Sort
- Minimum Spanning Tree
- Single-Source Shortest Path Problem
- Job Scheduling Problem
- Prim & #39;s Minimal Spanning Tree Algorithm
- Kruskal & #39;s Minimal Spanning Tree Algorithm
- Dijkstra & #39;s Minimal Spanning Tree Algorithm

```
#include <iostream>
using namespace std;
```

```
void selectionSort(int arr[], int n) {
    int i, j, min;
    for (i = 0; i < n - 1; i++) {
        min = i;
        for (j = i + 1; j < n; j++) {
            if (arr[j] < arr[min])
                min = j;
        }
        if (min != i)
            swap(arr[min], arr[i]);
    }
}
```

```
void printArray(int arr[], int size) {
    for (int i = 0; i < size; i++) {
        cout << arr[i] << " ";
    }
    cout << endl;
}
```

```
int main() {
    int n;
    cout << "Enter the size of the array: ";
    cin >> n;

    int arr[n];
```

```
cout << "Enter " << n << " elements:\n";
for (int i = 0; i < n; i++) {
    cin >> arr[i];
}

selectionSort(arr, n);
cout << "Sorted Array: ";
printArray(arr, n);

return 0;
}
```
